## DIGITAL SAFETY FOR STUDENTS

Technology has been a part of our daily life, but now we are relying on it more than ever. Our children are using devices for both their academic and social worlds, and it can be overwhelming trying to monitor every click and message that is sent. Here are some tips to help navigate this digital journey:

- Keep devices in central locations
- Discuss what personal information is with your child
- Talk with your child about what apps and communication methods they use
- Set privacy settings for devices and networks
- Talk with other parents
- Model good and safe digital behavior
- Stay up to date with safety features
- Explain to your children the risks and benefits of the internet
